- 5 mm Weather treated net for outdoor use
- Pro-style top and frame design with rounded back bar for competitive use
- 72"W x 48"H x 36"D
- Red/White

Instructions:

Made for ultimate durability, the Champion Sports Pro Steel Hockey Goal is constructed with a heavy-duty steel frame, which is sure to stand up to hard shots in outdoor games of street and ice hockey.

1. GOAL ASSEMBLY - Review the parts list before assembly. Figure 1.
2. Assemble all posts as shown. Welded net loops must face the correct direction for net attachment. Figure 2.
3. Be sure all pieces are completely inserted.
4. When attaching net, please line up corners correctly then set using Velcro ties. Fold the 60 poly cord in half and start roping from the front middle, wrapping through every other hole, pulling tightly throughout. It is recommended 2 people do this together. In some cases, one side of the net will seem larger than the other. Continue roping the net on. When the two sections of the rope meet in the back bottom-middle, the net will fit perfectly. Figure 3.
5. Tie off the rope at the back bottom of the goal with a secure knot, cut off excess, and repeat with the second rope on the other side. MAKE SURE TO ROPE THE NET ALL THE WAY.
