#MBR24
6 ROTATING TIERS MED BALL RACK

1. Attach vertical support post (D) to base (E) using all four (4) bolt units (G).
2. Install the casters (F) into the four (4) openings in the bottom of the base. Place the frame assembly in an upright position and lock the casters before proceeding to step 3.
3. Install one (1) storage ring (B) onto the vertical support post (D) and slide it to the bottom of the post. Next install one (1) spacer (C) onto the vertical support post (D) and slide it down until in direct contact with the top of the storage ring (B).
4. Repeat step 3 to install the remaining storage rings (B) and spacers (C) alternating between storage rings and spacers until you have placed the final storage ring (B) onto the vertical support post (D).
5. Install the cap (A) threading it onto the top of the vertical support post (D) until snug.
6. Complete a final inspection of the medicine ball tree to ensure all bolts, casters, and cap are secure. The Med Ball Tree is now ready for use.
