

SN280 FOLD UP GOAL

Features:

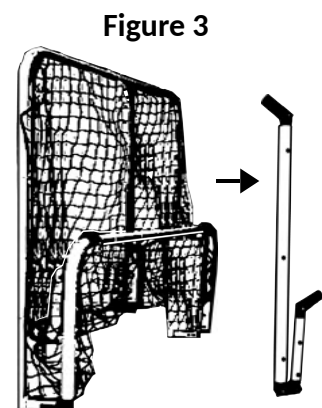

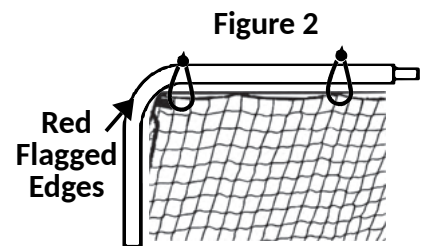

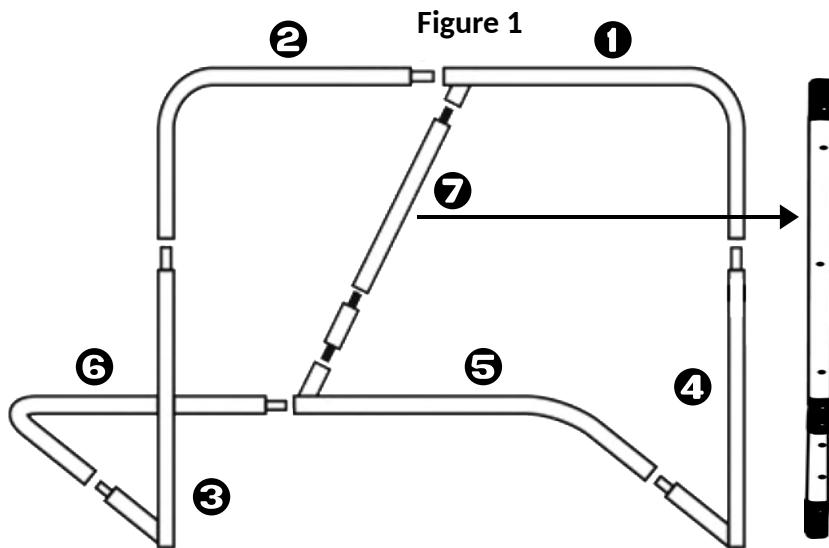

- Durable, powder-coated steel tube frame
- Easy fold welded steel frame
- 40-Ply, 3" mesh net
- Anchor stakes to secure goal to ground
- 72" x 48" x 30"

Instructions:

Great for gym classes or practices, the Champion Sports Fold Up Goal is designed to be easy to use and durable in outdoor environments.

1. Assemble the frame poles by connecting the numbered poles together. Figure 1
2. Insert the silver screws and black screws. Use the silver screws to connect steel pole to plastic at position and use the black screws to connect steel pole to steel pole at position.
3. Each hinge on the frame has a sleeve that slide over it to secure the hinge in place. Secure the frame by releasing the push pins and slide the sleeves over hinge and lock with push pins. The push pins will fasten the sleeve in both open and closed positions.
4. Use the bungee cord loops to attach the net to the frame of the goal. The red flagged edges of the net will be at the top left and right corners of the frame. Figure 2
5. To collapse the goal, the sleeves should be fastened in the open position so that the hinges are exposed. When the hinges are exposed, the bottom of the goal can be folded upward. Figure 3

PARTS:

- Poles 1 through 7
- 1 Net
- 4 Stakes
- 4 Rubber Clips
- 4 Silver Screws
- 12 Black Screws
- 28 Bungee Cord Loops
